Student Success Stories of Summer 2020

Shelby Green at EOS Venture Partners

Tuesday, October 13, 2020

Every year, Risk Management and Actuarial Science students from Temple University's Fox School of Business use the summer months to take the tools and skills learned in the classroom and apply them in the industry. 2020 has been a year of many unique challenges, but this past summer has been no exception for our students' grit. We are proud to recognize members who continued their pursuit to interact and engage with the industry by seeking out opportunities from organizations such as the Casualty Actuarial Society (CAS), Insurance Society of Philadelphia (ISOP), the Wholesale & Specialty Insurance Association (WSIA), the Gamma Iota Sigma Grand Chapter, and various firms for non-traditional externships.

Shelby Green, a Risk Management and Insurance and Actuarial Science double major, had arranged to participate in Munich Re's summer internship program. When she had to reschedule her summer plans, she adjusted her mentality and started her search for another way to develop her professional skills. An opportunity was brought to her attention by some of our amazing faculty here at Temple's Fox School of Business, Dr. Viswanathan and Dr. Dumm. Shelby maintained her grit and responded to it, interviewing and landing a spot to work virtually for a company over the summer.

This company was EOS Venture Partners, a venture capital firm that seeks out investments in the emerging InsurTech industry. Throughout Shelby's work for them, she helped grow their database of potential investments from 400 companies initially to over 1,000 by the end of the summer. She also sat in on investment meetings, learning the day to day activities that go on when investments are made. In her role, Shelby learned a great deal about the InsurTech market and the technologies that are bringing innovation to the insurance industry. She also enjoyed the experience of working with an international team and learning about different risk management approaches across countries. Overall Shelby was able to stay flexible and see a larger picture of where studying risk management and actuarial science can lead to.
